04.30 p.m.	Prize ceremony on the ice

SYSTEM OF PLAY

Rounds 1 to 5
The 12 teams have been divided into two groups of six – in the Round Robin stage, each team plays every other team in its group.

Final round
Following the Round Robin stage, the teams ranked first and second in each group will play against each other to determine their final positions. In other words, the two group winners will compete for the tournament title. The two runners-up from each group will play for third place, and so on.

During the round-robin matches, after the warm-up (9 minutes), two LSD stones will be played in accordance with World Cup rules.

Scoring
As the round-robin is played within the groups, only a win counts.
A win within the 8 ends = 3 points.
A draw after 8 ends = 1 point + an additional point is awarded to the team that won the extra end. In the event of a tie on points and an equal number of head-to-head matches, the lower DSC is the deciding factor.
